

# Usha expanding its product range

In 1958, Usha Industrial Corporation pioneered the manufacture of quality spinning cans and plastic carriers in India. Marketed under the brand name *texcan* the products are used in carding machine, ring frame, simplex, doubling frame, winding machine, TFO, etc.

Years of valuable experience backed by excellent technological know-how and continuous product innovations have established Usha as one of the largest manufacturers and exporters in the industry. The world class products have been accepted by clients spread across Asia, Africa and Europe. Lead by two visionary technocrats, Mr. Keshubhai Shah and Mr. Amit Shah, the Usha team is driven towards providing excellence at every stage. A team of qualified engineers, technicians and management personnel are at the heart of Usha's success.

Quality - is a Process  
Quality - is a Process

Consistent and high quality is what puts Usha ahead of the rest. Right from the selection of raw materials to checking at every step in the manufacturing process, all its products conform to international standards. The finished products are regularly checked and tested for performance in real life conditions. The raw materials are of highest grade engineering plastics such as - PPCB, ABS, polycarbonate, glass filled polypropylene, nylon and Delrin.

The company's high performance products are available in wide range of shapes, dimensions, weight and colours. They have a ready range for several applications as well as design and produce as per customer specification. Their products can be supplied as per fitness required by customer and eccentricity is within international standard.

The specially developed castors facilitating free movement, comes with sturdy pressed steel brackets, high impact nylon wheel with double ball bearing, simple designing for optimum performance, silent working and better wear & tear resistance.

The rope dyeing cans are especially designed for denim manufacturers having rope dyeing lant and are manufactured from HDPE cylindrical container, supported by pipe structure with Monkey ladder for easy working and has capacity to carry one ton of dyed yarn.

The Simplex bobbins manufactured from high quality ABS and PP material with length ranging from 290mm to 450mm and it is suitable for LMW, Textool, Texmaco Howa/RME, MEI, Rieter, Toyoda, MMC, Zinser, Jeetstex

Mr. Amit Shah

& Marzoli frames, etc.

The ring & doubling tubes manufactured from high quality PC, ABS and PP material, with ring and micro grooves, length ranging from 180mm to 300mm is ideal for cotton, wool and synthetic fibre as well as suitable for LMW, KTTM, Textool, Texmaco, MEI, Suessen, Rieter, Toyoda, Howa, Marzoli, Zinser and MMC frames.

Cones of different size and length with different surface suits cotton, wool and synthetic yarn and baby cone, Y-cone, clip cone & thread reel for sewing thread.

Winding tubes for cheese/TFO/OE and texturing with different surface to suit cotton, wool and synthetic yarn and roving & rubbing bobbins for woollen industry.

Perforated cones/tubes comes with light but sturdy 'flexitube' keeps carrier in perfect shape, transferring dye in all directions with deeper penetration. It reduces dye cost by maximizing dye penetration and manufactured from high quality engineering plastic to ensure maximum durability, performance and strength.

Hi-tech ring tubes manufactured from high quality PC and ABS and glass filled nylon suitable for plug type and Rabbath type spindle with wear proof Delrin bush inserted to avoid groove formation and available with stainless steel/brass metallic shield.

Usha's product range is not only well established in the country, but it has also got wide acceptance in countries like Japan, Indonesia, Thailand, Bangladesh, Vietnam, Nepal, Sri Lanka, Nigeria, Tanzania, Peru, Pakistan, Bahrain, Iran, Kenya, Dubai, Turkey and Brazil. ♦
